CRICAUCTION — CRICKET AUCTION & LIVE SCORING

Viewer Guide

Follow the auction and the match. No account needed.

Who this is for. Anyone following the tournament — players' families, club members, sponsors, the people in the room at the auction.

What is in this guide

1 You do not need an account

2 Watching the auction

3 Watching a match

4 On a phone

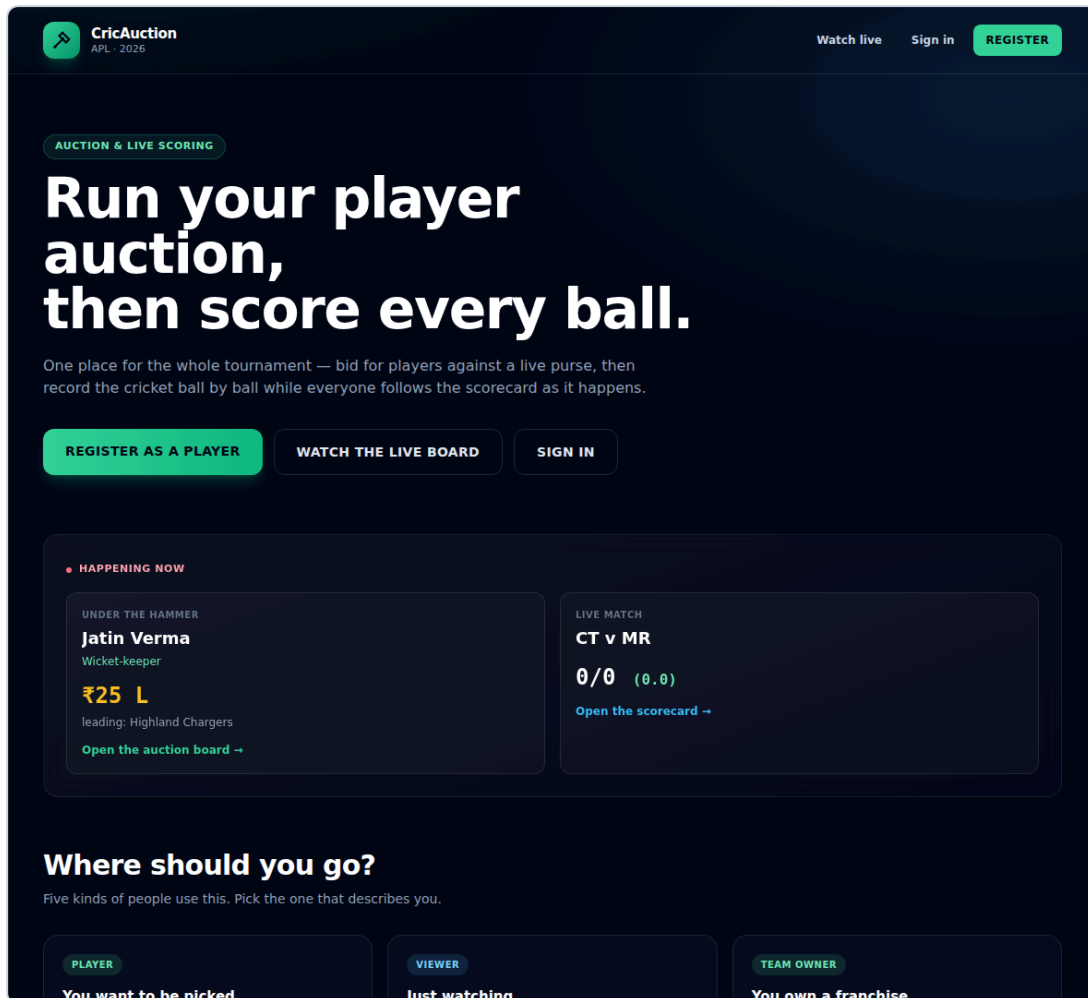

5 If something looks wrong

6 Words you will see

7 Getting help

1 You do not need an account

The auction board and the live scorecard are open to everybody. Open the address the organisers gave you and choose **Watch the live board**.

The front page. Watching needs nothing more than the address.

Everything a viewer sees is read-only. Nothing you do can change the auction or the score.

2 Watching the auction

The screenshot shows the CricAuction interface for the APL 2026 season. The top navigation bar includes 'Auction', 'Live Scoring', 'Fixtures', and 'Squads'. The 'AUCTION LIVE' status is highlighted. The main content area is titled 'UNDER THE HAMMER' and 'LOT #37 - SET A'. It features a player profile for Jatin Verma, a Wicket-keeper from India, with a base price of ₹15 L. His statistics are: 53 matches, 817 runs, 0 wickets, and a strike rate of 123.7. The current bid is ₹25 L by Highland Chargers. A countdown timer shows 0 seconds remaining. A message states: 'You're watching in read-only mode. Bids update live.' The bid feed shows the last two bids: Highland Chargers at ₹25 L and Harbour Warriors at ₹20 L.

The auction board.

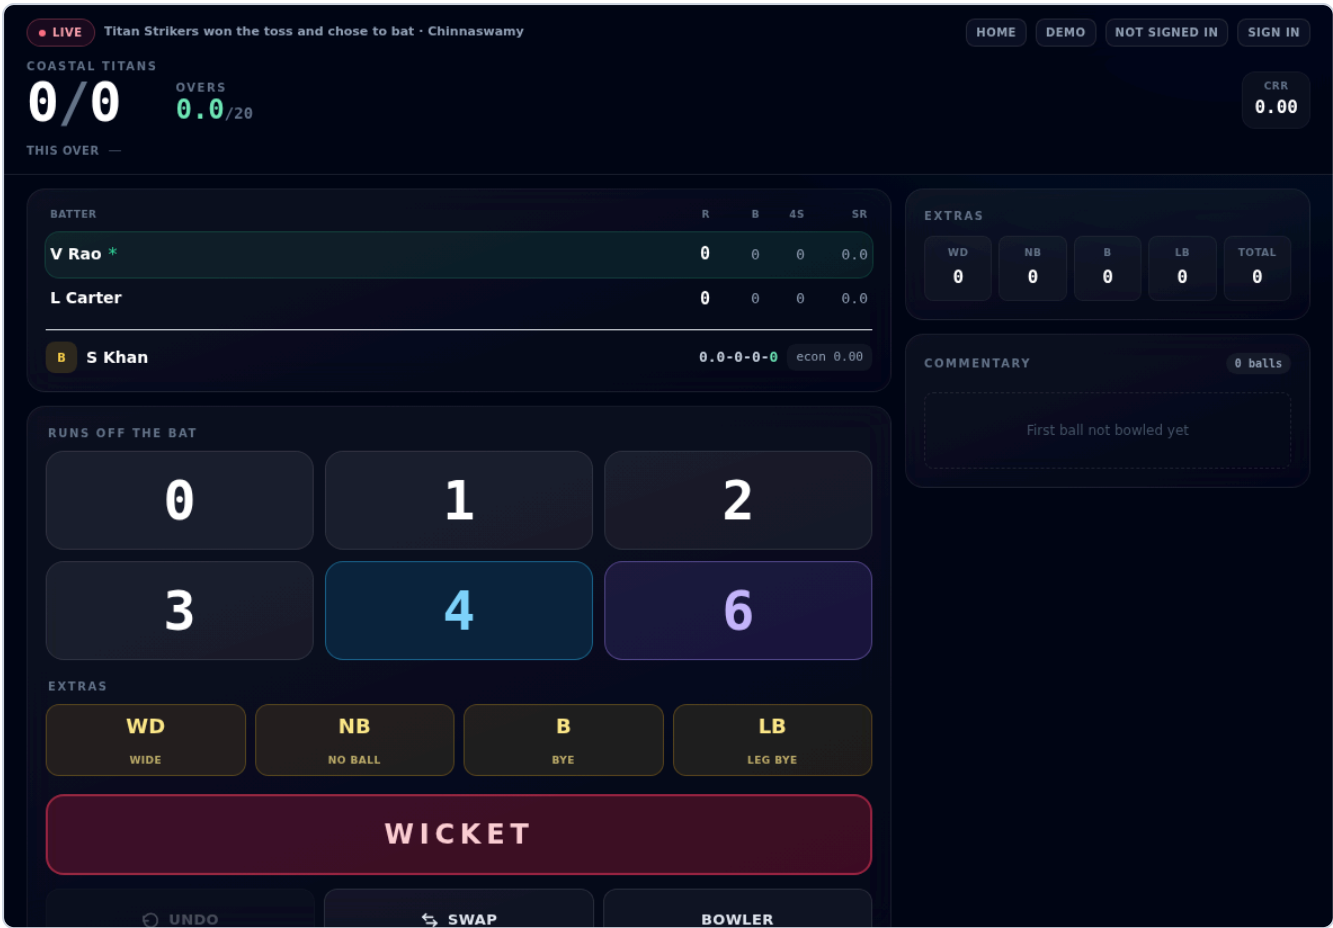

WHAT YOU SEE	WHAT IT MEANS
Under the hammer	The player being auctioned now, with their record
Current bid	The standing bid and which team holds it
Countdown	Time left on this lot. It restarts every time somebody bids
Purse board	What every team has left to spend, and how many players they have
Bid feed	The last few bids as they land
Up next	Who is coming up after this player

The board refreshes by itself every few seconds. You do not need to reload it.

Why the clock keeps going back up

Every accepted bid restarts the countdown. It stops a lot being won by whoever clicks last, and it means the bidding ends when the room stops bidding.

3 Watching a match

The live scorecard, updating as the scorer records each ball.

FIGURE	WHAT IT MEANS
124/3	124 runs for the loss of 3 wickets
Overs	Overs bowled out of the total for the innings
CRR	Current run rate — runs per over so far
RRR	Required run rate — runs per over still needed, when there is a target
Batters	Runs, balls faced, fours, sixes and strike rate. The star marks who is on strike
Bowler	Overs, maidens, runs conceded, wickets and economy
This over	The balls of the current over, in order

It updates as the scorer presses each key — usually a second or two behind the ball.

4 On a phone

Both screens are built for a phone first. Nothing to install.

To keep it handy, add it to your home screen: in Chrome, the menu then *Add to Home screen*; in Safari, the share button then *Add to Home Screen*. It then opens like an app.

5 If something looks wrong

WHAT YOU SEE	WHAT IT MEANS
"No auction is running"	No lot is open at the moment. Correct between sessions
"No match is being scored"	No match is live right now
The score has not moved in a while	Play may have stopped, or the scorer is between overs. Reload if it is a long gap
The page looks unstyled	A file did not load. Refresh the page
A number looks wrong	Tell the organisers — viewers cannot correct anything, by design

6 Words you will see

TERM	WHAT IT MEANS
Base price	The lowest a player can be bought for
Lot	One player being auctioned
Purse	The money a team has left to spend
Unsold	A lot that closed with no bid; the player may be re-listed
CRR	Current run rate — runs per over so far
RRR	Required run rate — runs per over still needed to win
Maiden	An over from which no runs were charged to the bowler
Economy	Runs a bowler concedes per over

7 Getting help

Two different kinds of problem, and they go to different people.

KIND OF PROBLEM	WHO TO ASK
Your account, your details, approvals, tournament codes, deadlines	Your tournament administrator — they can change all of it
The application itself: a page that will not load, a wrong number, something broken	Deam Software Solutios, through your administrator

When reporting a fault, say what you were doing, what you expected, and what happened instead. A photograph of the screen is worth a paragraph.
