CRICAUCTION — CRICKET AUCTION & LIVE SCORING

Scorer Guide

Record every ball, one thumb, in the sun.

Who this is for. The person at the ground with a phone, recording the match as it happens.

What is in this guide

- 1 What you do
 - 2 Your credentials, and the first sign-in
 - 3 Before the first ball
 - 4 The pad
 - 5 Runs
 - 6 Extras
 - 7 Wickets
 - 8 Undo
 - 9 What the pad works out for you
 - 10 What it will not let you do
 - 11 At the ground
 - 12 Your password
 - 13 If something goes wrong
 - 14 Words you will see
 - 15 Getting help
-

1 What you do

You record what happened to each ball. That is all — the application works out the rest: who is on strike, when the over ends, which runs are charged to the bowler, the run rate, the scorecard everyone else is watching.

Record, do not calculate

If you find yourself doing arithmetic, stop — you are doing the application's job. Press what happened and let it work out the consequences.

2 Your credentials, and the first sign-in

Scorers do not register themselves. An administrator creates your account and gives you a username and a password, usually read out or sent to you.

- 1 Sign in with the username and password you were given.
- 2 You will land straight on a **Change password** screen. This is expected.
- 3 Enter the password you were given, then choose your own — at least 8 characters with a letter and a number.
- 4 From then on you go straight to the scoring pad.

CricAuction Nikhil Rao **PLAYER** Sign out

Change password

You will need your current password.

CURRENT PASSWORD

NEW PASSWORD

At least 8 characters, with a letter and a number.

REPEAT NEW PASSWORD

CHANGE PASSWORD

[Back](#)

CricAuction — auction and live scoring

The first sign-in. No other screen opens until the issued password is replaced.

Why it insists

A password that was read out over a phone is known to at least two people. Forcing the change means the one you were handed never stays in use.

3 Before the first ball

Check these before the toss, not after it. Fixing them mid-over is miserable.

- ☐ You can sign in, and you have changed your password.
- ☐ The pad shows **the right match** — the two team names in the header.
- ☐ The badge in the header says **Saving**, not **Demo**. If it says Demo, what you type is not being recorded.
- ☐ The opening batters and the opening bowler are the right ones.
- ☐ Your phone will not lock every thirty seconds — set the screen timeout long.
- ☐ You have a signal, or you know where you do.

The Saving badge is the one that matters

Saving means every press is written to the database. **Demo** means it is not — you are looking at a practice scorecard. If it says Demo when it should not, you are not signed in as the scorer, or the administrator has not set the match live. Sort it out before the first ball.

4 The pad

The pad as it is actually used — one hand, at the boundary.

The keys are deliberately large. The whole pad is meant to be usable with one thumb, standing up, in sunlight, without looking too hard.

The same pad on a laptop.

The top of the screen always shows the score, the overs bowled, the run rate, both batters and the current bowler. It updates the instant you press a key — the page does not reload, so you never lose your place.

5 Runs

Press the number of runs the batters actually ran or hit: .

That is it. The application then:

- adds the runs to the batter's score and to the team total;
- charges them to the bowler;
- counts the ball as a legal delivery;
- **swaps the strike on odd runs;**
- ends the over after six legal deliveries and **swaps the strike again.**

You never tell it who is on strike

It works that out from the previous ball and the laws of the game. This is the single biggest source of mistakes in a paper scorebook, and the pad simply removes it.

6 Extras

KEY	USE IT WHEN	WHAT IT DOES
Wide	The ball was called wide	One run to the team, charged to the bowler, ball not counted
No ball	The ball was called no ball	One run, charged to the bowler, ball not counted
Bye	Runs taken with no contact off the bat	Runs to the team, not to the batter or the bowler; ball counted
Leg bye	Runs off the body	Runs to the team, not to the batter or the bowler; ball counted

Where extras also involve runs — four byes, or two runs off a no ball — press the extra and then the number of runs. The pad prompts you.

The distinction that matters

Wides and no balls do not count as one of the six. Byes and leg byes do. Get that right and the over count looks after itself.

7 Wickets

Press **Wicket**, then choose how the batter was out. The pad asks for whatever that dismissal needs — the fielder for a catch or a run out, the new batter coming in.

DISMISSAL	CHARGED TO THE BOWLER?
Bowled, caught, LBW, stumped, hit wicket	Yes
Run out, retired, obstructing the field, timed out	No

The pad brings in the next batter in the order and puts them at the right end — a new batter takes strike unless the wicket fell to the last ball of the over, or the batters had crossed.

A wicket off a no ball

Only a run out is possible. Press **No ball** first, then **Wicket**. If you press them the other way round, use **Undo** and start again.

8 Undo

Undo removes the last ball completely — the runs, the wicket, the strike change, the over count. Everything goes back exactly as it was.

Undo is one deep

It removes the most recent ball. To take back three balls, press it three times, most recent first. There is no way to reach into the middle of an over and change one ball; if that is needed, an administrator has to correct the record afterwards.

Use it the moment you notice. Undoing the last ball is trivial; undoing five while the bowler is running in is not.

9 What the pad works out for you

- **Strike rotation** — on odd runs, and at the end of every over.
- **The over count** — six legal deliveries, wides and no balls excluded.
- **Bowler's figures** — overs, maidens, runs, wickets, economy.
- **Batter's figures** — runs, balls faced, fours, sixes, strike rate.
- **Run rate**, and the required rate when there is a target.
- **Maidens** — an over from which no runs were charged to the bowler.

All of it is recalculated from the balls you recorded, every time. Nothing is kept as a running total that could drift out of step.

10 What it will not let you do

IF YOU TRY TO...	WHAT HAPPENS
Score a match that is not live	"This match is not in progress." Ask the administrator to set it live
Score without being signed in as the scorer or an administrator	The badge shows Demo and nothing is saved
Record a seventh legal ball in an over	Refused — the over has already ended
Record more than ten wickets	Refused — the innings is over
Undo when nothing has been recorded	Refused, harmlessly

Only the first innings, for now

Ball-by-ball scoring, the live scorecard and undo are complete for one innings. The innings break, the second-innings target and the result are not built yet. A match can be scored through the first innings and no further. Plan around it.

11 At the ground

- **Keep a paper backup of the over-by-over.** Not because the application loses things, but because phones run out of battery.
- **One scorer per match.** Two people on the same match will both press keys and neither will trust the total.
- **Press as it happens.** Recording three balls from memory at the end of an over is how mistakes get in.
- **If you lose signal,** stop pressing, note the balls on paper, and enter them when it comes back. A press that does not reach the server is not recorded.
- **Do not sign out mid-match** unless you are handing over.

12 Your password

Choose **Password** in the bar at the top of any screen you are signed in to. You will need your current password, and the new one needs at least eight characters with a letter and a number in it. It cannot be the same as the old one.

The change-password screen, reached from the top navigation.

If you are sent here the moment you sign in

That means the password you used was issued by an administrator — which is exactly how a scorer account starts life. It is temporary. No other screen will open until you replace it with one only you know. Do that once and you will not see this again.

Forgotten it? There is no reset-by-email. Ask an administrator: they can issue a new password and read it out to you, and you will be asked to change it straight away.

13 If something goes wrong

WHAT YOU SEE	WHAT TO DO
Badge says Demo	You are not signed in as the scorer, or the match is not live. Nothing is being saved
"No match is being scored"	No match is set live. Ask the administrator
A key does nothing	Check the badge still says Saving, then reload the page
The score is wrong by one ball	Undo the last ball and re-enter it
The score is wrong further back	Note it and tell the administrator — it needs a correction to the record
"Your session expired"	Sign in again. Balls already recorded are safe
The screen keeps locking	Set your phone screen timeout to its longest setting

14 Words you will see

TERM	WHAT IT MEANS
Legal delivery	A ball that counts toward the over — not a wide or a no ball
Extras	Runs not scored off the bat: wides, no balls, byes, leg byes
Strike rotation	Batters swapping ends after odd runs and at the end of an over
Maiden	An over from which no runs were charged to the bowler
Economy	Runs a bowler concedes per over
Strike rate	A batter's runs per 100 balls
CRR	Current run rate — runs per over so far
RRR	Required run rate — runs per over still needed to win

15 Getting help

Two different kinds of problem, and they go to different people.

KIND OF PROBLEM	WHO TO ASK
Your account, your details, approvals, tournament codes, deadlines	Your tournament administrator — they can change all of it
The application itself: a page that will not load, a wrong number, something broken	Deam Software Solutios, through your administrator

When reporting a fault, say what you were doing, what you expected, and what happened instead. A photograph of the screen is worth a paragraph.
